Web & E-Commerce: WordPress · WooCommerce · HTML5 · CSS3 · JavaScript · Netlify · Razorpay / UPI · JSON-LD Schema

Digital Growth & Marketing: Meta Ads · Instagram Reels Strategy · SEO Fundamentals · GA4 · Canva Pro · CapCut · AI Video Generation · AI Voice Synthesis

Data & Tools: Python (Pandas) · SQL · Power BI · Excel · Git · Docker · Open Graph · Webhooks · Django 6.0 · GitHub Copilot

EXPERIENCE

Freelance Digital Specialist & Founder · Vignesh Growth Lab · Coimbatore

Oct 2025 – Present

- Designed and delivered WooCommerce e-commerce stores and WordPress business websites for Tamil Nadu SMB clients — full lifecycle from scoping and development to payment gateway setup, WhatsApp API integration, and client handoff.
- Shipped ranisareesandboutique.com — WooCommerce catalogue, pre-filled WhatsApp order button, GA4 analytics, JSON-LD local schema, and Formsprees forms; client delivered an on-camera testimonial endorsing Vignesh Growth Lab.
- Architected a production n8n AI automation pipeline: WhatsApp Trigger → smart routing → Gemini AI reply generation → Google Sheets CRM logger → WhatsApp auto-send. Fully operational AI customer support system.
- Managed end-to-end client delivery (₹5,000–₹25,000): proposals, timelines, milestone billing, and post-launch support.
- Produced bilingual Tamil & English content — Canva graphics, CapCut Reels, and AI-generated promo videos — for local business clients.

Operations Senior Representative · NTT DATA · India (Client: Centene)

Nov 2021 – Dec 2022

- Processed and validated high-volume healthcare claims with strong accuracy, documentation, and compliance discipline at a global IT services firm.
- Built structured reporting, cross-functional coordination, and client communication skills directly applicable to technical project delivery.

Data Analyst Intern · Innobyte Services · Remote

2024

- Analysed Amazon sales data using Python (Pandas); built interactive Power BI dashboards tracking revenue, customer segments, and inventory KPIs.
- Delivered independently in a remote async environment with strong documentation and self-managed execution.

KEY PROJECTS

Spares & Warranty Management System — Dheera Motors · Real Client Delivery · Django 6.0

- Developed a full-stack Django web application to manage end-to-end warranty service requests and spare parts lifecycle for an electric bike showroom and service centre.
- Built multi-stage Service Request (SR) workflow — SR creation, Delivery Challan dispatch, transit tracking, verification, and final closure — with automated status transitions and loop-back handling for missing parts.
- Designed dual-routing assignment logic automatically directing verified requests to External Vendor pipeline or Internal Technician queue with outcome tracking (Approved / Rejected / Repair / Scrap).
- Configured environment-driven MySQL/SQLite database switching with zero hardcoded credentials using python-decouple.
- Leveraged GitHub Copilot for AI-assisted development, accelerating delivery for a live production client.

Tech Stack: Django 6.0, Python 3.14, MySQL, SQLite, GitHub Copilot, python-decouple

AI WhatsApp Automation Workflow — n8n + Gemini AI · Live & Demonstrable

- Production AI customer engagement pipeline: WhatsApp Trigger → If/Else routing → Gemini AI reply generation → Google Sheets CRM logger → WhatsApp auto-send. Fully deployed and operational.

Tech Stack: n8n, WhatsApp Business API, Gemini AI, OpenAI, Google Sheets, Webhooks

Rani Sarees & Boutique — ranisareesandboutique.com · Live Client Delivery

- Full WooCommerce deployment with product catalogue, pre-filled WhatsApp order integration, GA4 analytics, JSON-LD local schema, and Formspree contact forms. Client delivered on-camera testimonial recommending VGL.

Tech Stack: WordPress, WooCommerce, WhatsApp API, GA4, JSON-LD Schema, Formspree, Razorpay

Masala Mill — WooCommerce E-Commerce Store · ■12,000 Project

- End-to-end WooCommerce store: weight-based product variants, UPI/card payment gateway, WhatsApp order button, bilingual Tamil & English content, admin training — delivered on a 4-week timeline.

Tech Stack: WordPress, WooCommerce, Razorpay / UPI, WhatsApp API, JSON-LD, Canva

Albatross Gym — Business Landing Page · Netlify Deployed

- Mobile-responsive gym website with domain configuration, Netlify deployment, and 3-month priority support — full VGL client project delivery.

Tech Stack: WordPress, Netlify, HTML5, CSS3, Formspree
